Our mission is to: *“Provide exceptional value in the area of environmental and industrial hygiene consulting.”*

WISE NEWSLETTER

JULY–AUGUST 2010

Will you be certified to Repair, Renovate or Paint a Pre-1978 residence by December 2010?*

EPA Requirements: Common renovation activities like sanding, cutting, and demolition can create hazardous lead dust and chips from lead-based paint, which can be harmful to adults and particularly to children.

To protect against this risk, the **EPA issued** a rule requiring the use of lead-safe practices and other actions aimed at preventing lead poisoning. **Under the rule (40 CFR Part 745), beginning on April 22, 2010, contractor’s personnel performing renovation, repair and painting projects that disturb lead-based paint in homes and child occupied facilities built before 1978 must be trained and must follow specific work practices to prevent lead contamination or face fines up to \$37,500 per violation.**

***On June 21, 2010 the EPA issued the following:** The EPA will not enforce against individual renovation workers if the person has applied to enroll in, or has enrolled in, not later than September 30, 2010, a certified renovator class to train to train contractors in practices necessary for compliance with the final rules. Renovators must complete the class by December 31, 2010.

Sign-up for our next LRRP and OSHA Lead in Construction Action Level, Level 1 Training class: August 6, 2010 8:30am-5:00pm

Contact Heather Koehler at (775) 827-2717 or training@wisecandt.com to register for upcoming classes.

A Letter from Our President...

I am pleased to have this space to tell you a little about our experience and passion for excellence. **WISE** Consulting and Training, Inc. has been providing quality environmental/industrial hygiene consulting services for *residential and commercial* clients in the Reno/Sparks/Lake Tahoe area for over 12 years. We specialize in consulting and testing for asbestos, lead, radon, mold and indoor air quality projects. We also teach environmental courses through our regional training center.

WISE is a regionally respected environmental and industrial hygiene consulting firm specializing in building science and building related environmental issues. I personally have been involved in the environmental industry since the 1980’s when, as a partner in an engineering and materials testing firm, I was given the opportunity to establish an Environmental Division of that firm. In recent years I have devoted my work exclusively to environmental consulting and training; and have supervised the completion of over 6,000 environmental consulting projects and have participated in over 750 accredited environmental training courses. I have held asbestos and/or environmental licenses in nine states and two EPA Regions.

At **WISE**, the attitude of service begins with the personal integrity, and all positions within the firm are filled based on both technical ability and demonstrated character. The consultants and support personnel on the **WISE** team are tasked to *“serving others in the manner we want to be served.”* As a mid-sized firm, with nine full and part-time employees and the best diagnostic equipment on the market, we are capable of performing small and large projects very efficiently.

Please feel free to contact me if you have any questions about how **WISE** can help with your residential or commercial project. We look forward to earning your business.

Respectfully,

J. Tom Wise
President; Technical Director
CEM, NAC, CAC, CEI, CMI
